Eight years in industrial production at Volvo Trucks, most recently as a team leader and union representative. Now studying full-stack web development at Yrgo.

Education

Web Developer
Yrgo

September 2025 - May 2027

Technology Programme
NTI Gymnasiet Johanneberg

August 2011 - June 2014

Projects

Loopland

loopland.se - PHP, Laravel, React, TypeScript, SQL

A digital amusement park built with two classmates, connecting independently developed attractions through a shared API that synchronised rewards, currency exchange, the park economy, and a common leaderboard.

Yrco

yrco.se - React, Node.js, Express, MongoDB, OAuth

A networking app for an event connecting Yrgo design and web development students with industry professionals. Attendees selected seven traits to create a personal colour palette and find complementary connections.

Experience

Team Leader
Volvo Trucks Tuve

October 2024 - February 2025

Led a production team responsible for assembling interior components for truck cabins, coordinated daily work, supported team members, and contributed to continuous improvement initiatives.

Union Representative
IF Metall

September 2022 - October 2024

Represented colleagues in workplace and personnel matters, served on a local union board supporting more than 700 members, and helped improve internal efficiency by digitising administrative processes.

Truck Assembler
Volvo Trucks Tuve

September 2016 - October 2024

Assembled interior components for truck cabins, followed production standards, and worked closely with the team to maintain quality, safety, and an efficient workflow.
