EDUCATION

Web Developer

September 2025 - September 2026

Yrgo

Higher vocational programme in front-end and back-end development, databases, APIs, and digital design.

PROJECTS

Loopland

loopland.se · PHP, Laravel, React, TypeScript, PostgreSQL, Railway

A digital amusement park bringing together games developed independently by groups across our class through a shared Centralbank API. In a team of three developers, I was responsible for that API — a Laravel service published as an OpenAPI contract for other groups to build against, with per-game keys and delegated identity tokens. I deployed the service and the park's React front-end on Railway.

Yrco

yrco.se · React, Node.js, Express, MongoDB, OAuth, Railway

A mobile-only app for an in-person event connecting Yrgo students with industry professionals. Attendees picked seven traits to form colour palettes and find complementary connections. Built by two designers and two developers, I owned the architecture, most of the implementation, and the deployments.

EXPERIENCE

Truck Assembler

October 2026 - Present

Volvo Trucks Tuve · freelance web development alongside

Team Leader

October 2024 - February 2025

Volvo Trucks Tuve

Led a production team assembling interior components for truck cabins.

- Coordinated the day's work and supported the team through it.
- Drove continuous improvement work and held a central role in how the team worked together.

Union Representative

September 2022 - October 2024

IF Metall · held alongside the assembly role

Represented colleagues on workplace and personnel matters as their contact representative.

- Served on a local ten-person union board answering for the interests of more than 700 members.
- Digitised the leave-of-absence process for union training with Adobe Acrobat Sign.
- Led a plant-wide workwear survey: I set its structure and the material that drove turnout.
- Trained the union on AI communication tools to raise engagement and speed information flow.

Truck Assembler

September 2016 - October 2024

Volvo Trucks Tuve

Assembled interior components for truck cabins, working with the team on quality, safety, and flow.
