Eight years in industrial production at Volvo Trucks, most recently as a team leader and union representative. Now studying full-stack web development at Yrgo.

EDUCATION

Web Developer

September 2025 - May 2027

Yrgo

Two-year higher vocational programme covering front-end and back-end development, databases, APIs, and digital design.

PROJECTS

Loopland

loopland.se · PHP, Laravel, React, TypeScript, SQL, Railway

A digital amusement park assembled from games each group in our class built on its own, integrated through one shared Centralbank API. In a team of three developers, I led that API — a Laravel service published as an OpenAPI contract for other groups to build against, with per-game keys and delegated identity tokens. I deployed the service and the park's React front-end on Railway.

Yrco

yrco.se · React, Node.js, Express, MongoDB, OAuth, Railway

A networking app for an event connecting Yrgo students with industry professionals. Attendees picked seven traits to form a colour palette and find complementary connections. Built in a team of four, two designers and two developers: I owned the architecture, most of the implementation, and the deployments.

EXPERIENCE

Team Leader

October 2024 - February 2025

Volvo Trucks Tuve

Led a production team assembling interior components for truck cabins.

- Coordinated the day's work and supported the team through it.
- Drove continuous improvement work and held a central role in how the team worked together.

Union Representative

September 2022 - October 2024

IF Metall · held alongside the assembly role

Represented colleagues on workplace and personnel matters as their contact representative.

- Served on a local ten-person union board answering for the interests of more than 700 members.
- Digitised the leave-of-absence process for union training with Adobe Acrobat Sign.
- Led a plant-wide workwear survey: I set its structure and the material that drove turnout.
- Trained the union on AI communication tools to raise engagement and speed information flow.

Truck Assembler

September 2016 - October 2024

Volvo Trucks Tuve

Assembled interior components for truck cabins, working with the team on quality, safety, and flow.
